Checkboxes, paragraphs, and regions

Enjoy our B&B! Please check off your daily menu preferences:

Monday

☐ Fruit   ☑ Bacon   ☐ Oatmeal   ☑ Eggs & Toast

Tuesday

☑ Fruit   ☐ Sausage   ☑ Omelet   ☑ Grits

Wednesday

☑ Fruit   ☐ Sausage   ☑ Oatmeal   ☑ French Toast

Please note: We'll notify you within 24 hours if we can't accommodate your preferences.
Call or text 203.123.4567 if you change your selections.

In Part 2, you used Table and Row methods. Now check out the left and right panes to see how Checkboxes, Paragraphs, and Regions work.

Mix it up

Try these changes and check the right pane to see how the output changes:

Replace	With	Results
`"text": "monday"`	`"text": "tuesday"`	Grabs tuesday's fruit selection
`"in part 2"`	`"mix it up"`	Grabs all lines up to "Mix it up"

Challenges

1. Grab Tuesday's grits selection (hint: it's the only day with grits,
   so do you still need a match array?)
2. Grab all Wednesday options (hint: change the "all_options" anchor to "wednesday",
then watch the green-outlined region resize as you change the "width" number)
